Technology for Revolution: Opportunity for a New Religion and a New Society is a treatise on religious and social reform. It is an attempt to create a blue print for the route map to a happy, healthy, peaceful, progressive, prosperous, creative and constructive world. The book advocates that ultimate social peace and individual mental bliss and freedom cannot be achieved without adopting a spiritual way of life with a sense of justice. It explores the issues with which the human society is afflicted at present and then goes on to suggest a new model of governance and administration utilizing the opportunities made available by the changes in the information and communication technology. The author suggests that the root cause of almost all the sociopolitical issues are linked to the degeneration and corruption in the religious and spiritual values which results in an overall degradation of the social ethics. It delves deep into the issue of corruption and degeneration of all the religious practices across the globe. It exposes how religious practices have completely abandoned Truth, God and spirituality and has embraced blatant commercialism in the name of God and faith. It then explores the effects of this spiritual and religious degeneration in the sociopolitical and administrative arena taking examples and references mainly from the Indian society. Having explored the problem and its root cause in detail, the book presents a comprehensive universal and global manifesto for governance and administration applicable to the humanity as a whole. It combines the concepts of social and economic justice of Karl Marx, the concepts of Ram Rajya of Mahatma Gandhi, the concepts of human equality of Mandela and Martin Luther King...
